***Election/Restrictions***

1. Claims 1-5, and 11 drawn to a method and system for analyzing nucleic acid, classified in class 702, subclass 19.
2. Claims 6-10, drawn to a method for generating revenue from computer scoring of data, classified in class 705, subclass 21.
3. Claims 12-16, drawn to a method for producing nucleic acid analysis involving comparison of two signals from two nucleic acid samples, classified in class 435, subclass 6.
4. Claims 17-22, drawn to a method for resolving DNA mixtures involving representing DNA profile data of a mixed sample in a linear equation, classified in class 436, subclass 94.

The inventions are distinct, each from the other because of the following reasons:

Inventions 1-4 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the inventions have different functions and effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
